## **Silverfish Attractant Tablets**

### **PRODUCT CODE:**

1103008251

### **PRODUCT DESCRIPTION:**

Non-hazardous feed-based tablets packed in a blister pack to be used as lure to attract long-tailed silverfish into the monitoring trap.

### **Dimensions:**

Diameter:               approx. 8 mm  
Weight:                 0.25 g  
Pack size:              5 x 8mm tablets

### **TABLET DETAILS:**

Sticky traps are important tools for detecting and monitoring populations, indicating the source of an infestation, and/or assessing the effectiveness of a control treatment. These attractant tablets, which contain a feed-based attractant, ensure increased catches for monitoring purposes.

### **PLACEMENT OF TRAPS**

Attractant tablets should be removed from the blister pack, and one tablet should be added to each monitoring trap. The traps should then be placed in areas where the insects thrive, such as moist, warm environments. You often find them in bathrooms, utility rooms, kitchens, and attics or lofts. They hide in cracks and crevices, where they also lay their eggs.

### **TRAP SERVICING:**

Attractant tablets are effective for approx. 6 weeks. The traps should be replaced after this time or sooner if they are full of insects or the adhesive surface has been exposed to dirt.

### **STORAGE:**

It should be stored at approx. 20 °C and away from direct heat and sunlight.  
Shelf life is 2 years after the production date.
